“ *DeeDee.. We were the closest of cousins during childhood. Where one of us was the other wasn't too far behind or nearby. Grade school years of sleepovers, fireflies, kites, and dolls that were followed by Middle school years of sleepovers, playing music and singing, fireflies, staying up late to talk about what we thought our future might be...and so fast came the High school years of sleepover but not as many, music and singing, chats about boys, and a plan of what we were going to do ~ working as cosmetologists to pay for Nursing School ! Sadly your health issues started 'round then and things never came to be. I will miss you Cousin and will forever remember how things \"were.\" I love you. TT.*
